

ACCIDENT REPORTING POLICY

All accidents, incidents, near misses and cases of reportable diseases occurring at work will be reported in accordance with the requirements of RIDDOR 2013, the company's accident reporting procedures and those of the client.

Investigations into accidents and incidents will be carried out in order to determine their underlying causes and recommend measures, which may be required to prevent recurrence. The Managing Director or CEO will monitor incidents, and the progress of suggested remedial actions and lead in-house investigations where fatalities or other serious incidents have occurred. The SHEQ Manager will monitor accident statistics to identify any trends, and distribute the findings throughout the company.

Any recommendations made will be implemented in a timely manner, and the SHEQ Manager will make any changes to company safety procedures identified as a result of accident or incident investigations.

Information on reporting accident, incidents etc, are detailed in the company procedure and included as part of the Method Statement for each worksite.
